

OS Version: REL.PHAROS.10.114

ROM Date: 2010.03.11

Password: 0Hg8CG7T9Z

This package provides Windows Mobile OS update for the Pharos Traveler 137.

For Windows Vista:

- (1) Turn off your PC's screen saver and power saving mode
- (2) Make sure your Traveler 137's battery is more than 60% full
- (3) Connect your Traveler 137 to your **Windows Vista** PC via an USB cable
- (4) Run Pharos137Update.exe
- (5) Enter the [password](#) listed above
- (6) Follow the instructions; the OS download may take about 15 minutes
- (7) After the OS download completes, please follow the Windows Mobile startup procedures, let Auto Installation take place until it finishes
- (8) SOFT RESET your Traveler 137. **This step is important; it cleans up some residuals left by the OS update and Auto Installation.**

For Windows XP:

- (1) Turn off your PC's screen saver and power saving mode
- (2) Make sure your Traveler 137's battery is more than 60% full
- (3) Connect your Traveler 137 to your **Windows XP** PC via an USB cable
- (4) Use stylus to push the soft reset button of your Traveler 137 (see figure in the next page)
- (5) Then immediate pressing and holding both OK and Volume-down buttons
- (6) Confirm your Traveler 137 switches to download mode
- (7) Run Pharos137Update.exe
- (8) Enter the [password](#) listed above
- (9) Follow the instructions; the OS download may take about 15 minutes
- (10) After the OS download completes, please follow the Windows Mobile startup procedures, let Auto Installation take place until it finishes
- (11) SOFT RESET your Traveler 137. **This step is important; it cleans up some residuals left by the OS update and Auto Installation.**

If you encounter any problem, please do not hesitate to call Aaron Sherburn at 310-212-7088 ext 107.

Your feedback and suggestion are always appreciated. We will continuously provide upgrades because your satisfaction is our passion and top priority.

Thank you for choosing the Pharos' Traveler 137.
